PROFESSIONAL SUMMARY

A tertiary-qualified information technology professional ready to move into a first dedicated helpdesk or service-desk position, backed by a Bachelor of Software Engineering and Business Informatics and a completed Australian Computer Society Professional Year. Bringing day-to-day exposure to fault diagnosis on point-of-sale hardware and software, small-network setup, device support, and account provisioning built up across busy retail management and hands-on volunteer technology roles. Comfortable breaking a problem down step by step, explaining the fix in plain terms to people without a technical background, and leaving a clear written trail behind every job. Offering Microsoft 365 administration, access-management, and coaching strengths alongside current membership of the Australian Computer Society.

I am committed to my personal and professional growth and I am seeking an opportunity to provide loyalty, value and a desire to succeed in a respected and progressive organisation.

EMPLOYMENT HISTORY

Eight Stems (Canberra) | 2024 – Present
IT Support and Systems Administrator (Volunteer)

- Acting as the only technology resource for a small local enterprise, single-handedly looking after its registers, in-house network, and website.
- Working through hardware, software, and connection problems as they surfaced and getting systems back online without calling in outside help.
- Running scheduled checks and watching for early warning signs to head off outages before they reached the shop floor.

Futureway Consulting (Canberra) | November 2025 – February 2026
Website Developer and Designer

- Delivering web solutions for clients from brief through to launch, maintaining clear stakeholder communication throughout each engagement.
- Producing thorough handover documentation at project close to support ongoing client maintenance and system continuity.
- Managing project priorities and timelines independently to meet agreed client deliverables and standards.

Ability News (Canberra) | August 2022 – March 2023
Website Developer (Volunteer)

- Developing a website built to WCAG 2.0 accessibility standards for a small independent publication, designing for access from the outset.
- Writing how-to material for staff and trialling the site with readers who live with disability to confirm it worked for everyone.
- Turning the editorial team's content needs into working pages that met the required accessibility standards.

Shaver Shop (Civic Centre, Canberra) | June 2026 – Present
Store Manager

- Taking ownership of every register and connected device in the store, setting hardware up, applying software updates, and clearing faults on the spot so trading is never held up.
- Creating logins and access rights for each new starter and then sitting with them individually to build confidence across the store's platforms and procedures.
- Keeping a written record of faults, fixes, and how-to steps, and flagging recurring problems upward so management can act on the pattern.
- Running the outlet day to day across rostering, stock, and standards while personally stepping in to clear any service or technology snag as it arises.

Lovisa (Canberra) | July 2024 – Present (Part-Time)
Store Manager

- Getting registers back into service when hardware or software dropped out mid-trade, tracing the cause quickly to keep the queue moving during the busiest periods.
- Setting up accounts and permission levels for incoming staff and running them through each platform hands-on until they could work unsupervised.

- Building a small library of short reference guides from the faults that recurred, so the team could resolve everyday issues without waiting on help.
- Coaching a ten-person crew across every system and routine, lifting consistency and cutting everyday operating mistakes by roughly a quarter.
- Holding inventory counts, stocktakes, and shrinkage to account while handling escalated customer matters calmly across a high daily volume.

Just Group (Jacqui E, Canberra) | December 2021 – July 2024
Sales Assistant and Acting Team Lead

- Spotting and clearing register faults on a busy shop floor and sorting them at the counter so customers were never left waiting.
- Taking charge of the floor whenever senior staff were away, keeping the team focused and service holding steady.
- Handling front-line retail duties while forming the customer-facing problem-solving habits later carried into technical work.

Australian Indigenous Mentoring Experience (AIME) | February 2019 – December 2019
Mentor Volunteer

- Mentoring high-school students in information technology and digital literacy, running technical workshops to build practical skills.
- Working alongside school staff to identify and resolve technical issues as they arose during sessions.

FURTHER INFORMATION

Formal Education

- Bachelor of Software Engineering and Business Informatics | University of Canberra | 2020 – 2023 (Distinctions in Information Security and Workflow and Process Management; ICT Capstone Project, Distinction)
- Diploma of Information Technology | University of Canberra | 2019 – 2020

Licences and Certifications

- ACS Professional Year Program (ICT) | Queensland International Business Academy | 2025 – 2026 (ICT internship placement completed February 2026)
- Datacom Service Desk Job Simulation | Forage | 2026
- Member, Australian Computer Society (ID 4440637)

Proficiencies

- Microsoft 365 administration and end-user device support
- Point-of-sale systems administration and troubleshooting
- Network configuration, user-access management, and technical documentation

Employment Related Skills and Strengths

- Demonstrates hands-on technology-support ability built through live fault-finding on registers and connected devices, small-network setup, device assistance, and account provisioning across paid retail and volunteer settings.
- Exhibits a strong academic and professional ICT foundation, holding a Bachelor of Software Engineering and Business Informatics with distinctions and a completed Australian Computer Society Professional Year including an industry internship placement.
- Possesses hands-on incident-response and service-desk exposure, having completed a Datacom service-desk simulation covering incident triage, ticket prioritisation, and client communication, and resolved live faults without external escalation.
- Maintains user-access-management and onboarding capability, configuring permissions and guiding new staff through business systems while producing incident logs, procedure guides, and technical documentation.
- Skilled in Microsoft 365 administration, POS systems, and network configuration, complemented by web-development experience delivering accessible, standards-compliant solutions for clients and community organisations.
- A clear communicator and structured problem-solver who translates technical issues for non-technical users, trains and coaches team members, and keeps accurate records throughout every engagement.
